

A BETTER WAY

A smarter, more compassionate response to behavioral health crisis.

Too often, a behavioral health crisis leaves families and first responders with only two options: the emergency room or jail.

At times, neither is the right fit.

Andrews Diversion Center creates a better way:

Timely screening. Short-term stabilization. A direct connection to care and support when the ER or jail is not the best option.

- Serving Henderson, Rains, Smith, Wood, and Van Zandt counties
- Care provided by mental health professionals who understand crisis care
- A calming place to go for immediate support
- A practical option to prepare for the next stage of recovery or return home
